Approved For Release 2004/11/30 : CIA-RDP78B04770A000700040090-3

	In-house testing did not commence until the week of 19 October,	i
	but since the contractor is working on an accelerated study at our	
j	special request, the time schedule is a product of his best effort,	
,	which is being closely monitored.	•
ė	Hitzor an county mean cont	
25X1	worked at NPIC facilities the	
20/(1	weeks of 12-16 and 19-21 October drawing up the final tests, which	
	they administered for the frist three day's sessions. Administering	
i :	of tests was from then on assumed by in-house personnel, and	
OEV4		
25X1	scoring completed tests. Each day's tests were thereafter airmailed	
	to Human Factors. Scoring evidently required at least six of	
25X1	brofessional staff members since the test was open-ended	
23/	in design and required careful analysis of individual responses.	
ş (the state of the state design and required careful analysis of individual responses.	
25X1	momented to us on 27 October that magranges	
23/1		
	on the tests which had been scored to that date were of low efficiency	\$
1	and showed confusion and failure to discriminate on the part of the PI's	1
Ť	participating. Tests could therefore not be scored as originally	:
5	intended, and any scoring key would involve extreme complexities	÷.
;	which cannot be afforded in time alone.	
5		
÷	Modifications to the experimental design were made immediately	1
į	and testing was to be resumed 2 November with adminis-	25X1
	tering. The change involved a focusing down of the questions from open	
	target areas to individual circled aircraft. (Modification was justified	d.
Ŷ	on the basis that a scanning task is not part of the problem of detail	
j	identification called for by the range of resolutions being considered.)
